

IN CANCER CONTROL, WE NEED DATA TO GUIDE:

1. Planning for the program
2. Resource allocation
3. Research at all levels
4. Assessment of results
5. Evaluation of program

ROLE OF CANCER REGISTRY

- 1) To obtain basic clinical and epidemiologic data
- 2) To describe incidence patterns
- 3) To monitor incidence and mortality trends
- 4) To support cancer research

A facility that collects, stores, analyses and interprets data on persons with cancer.

FACTORS FAVOURING REGISTRATION

1. Stable and compact population
2. Good infrastructure and communications
3. Available and accessible medical care
4. Comprehensive registration of deaths
5. Co-operation of healthcare professionals

SOURCES OF INFORMATION

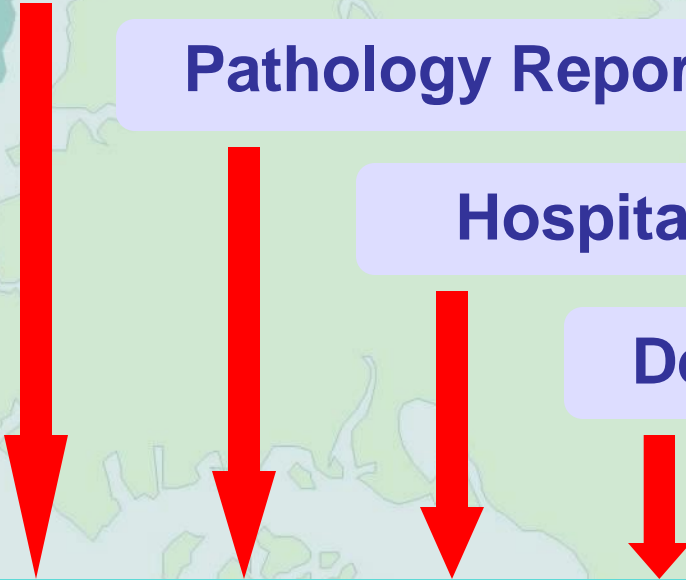

Notifications by Medical Practitioners

Pathology Reports

Hospital Discharge Summaries

Death Certificates

REGISTER OF ALL CANCER CASES

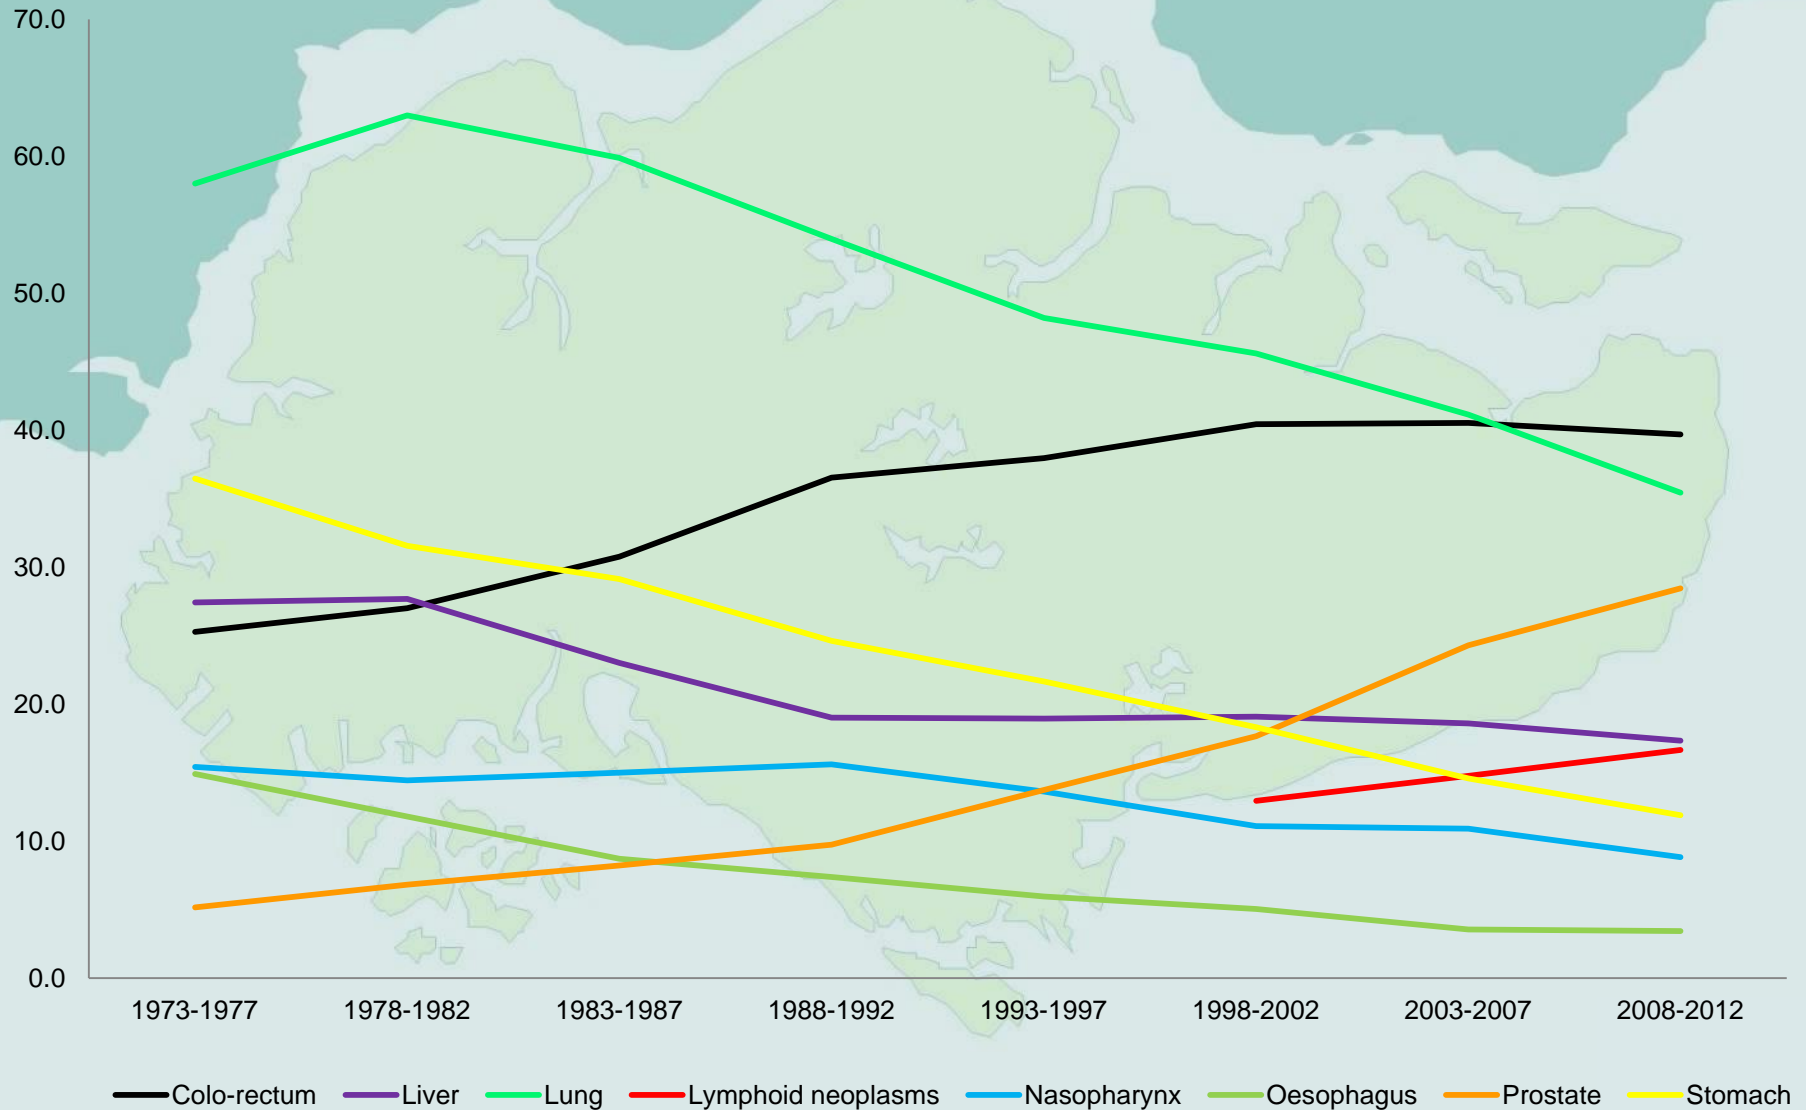

FACTORS FOR SUCCESS

1. Ensure accuracy of information
2. Maintain adequate coverage
3. Avoid duplicate registration
4. Update information regularly
5. Store data safely
6. Protect confidentiality

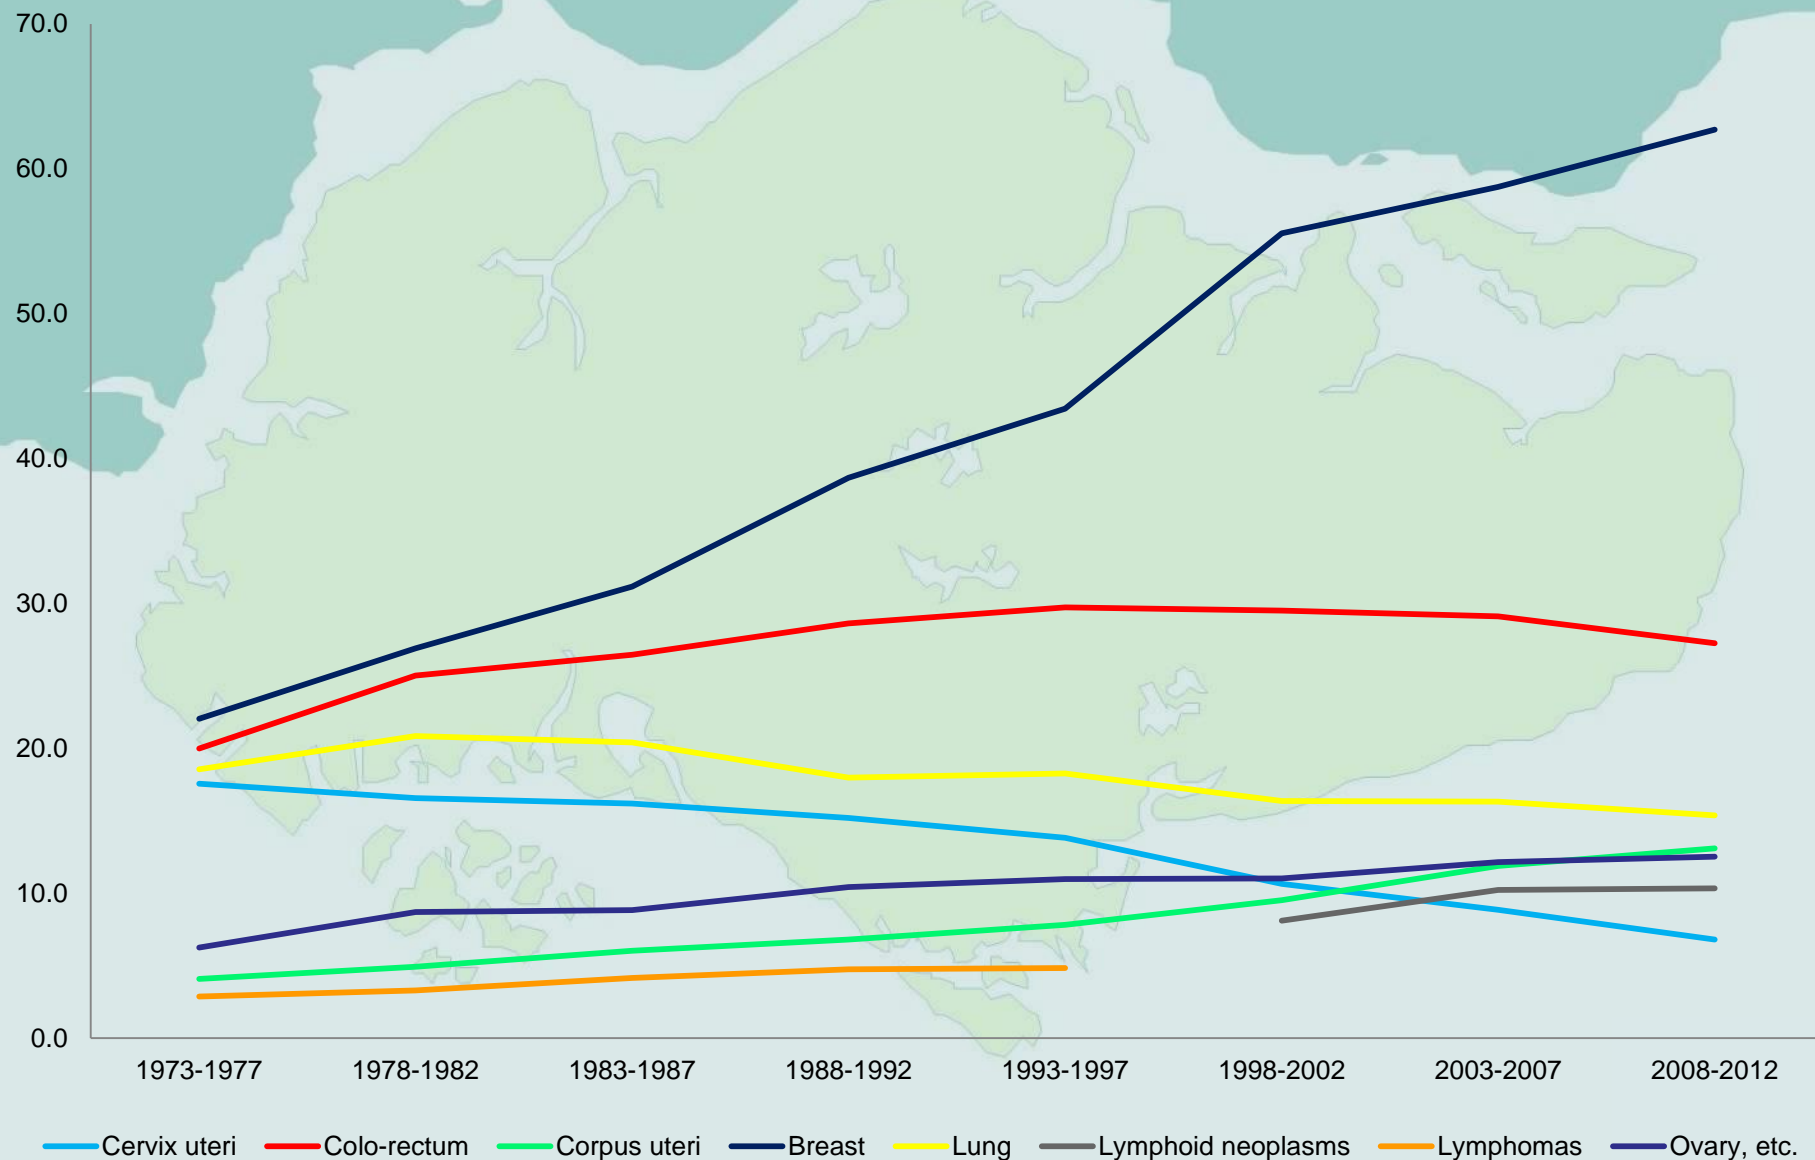

Singapore Cancer Registry

1. Population-based registry which started operations on 1st January 1968.
2. Now administered by the National Registry of Diseases Office (MOH).
3. Made statutorily compulsory since 2007.
4. Facilitated by unique personal ID number.
5. Produced altogether 9 reports, with one more to be released 2016.
