Support for Combined Radiology/Pathology Image Analysis Challenges and Studies

Collaboration between the Saltz and Kalpathy-Cramer labs to organize, in close coordination with the NCI, combined Radiology/Pathology Challenge at MICCAI 2015. Challenge was supported by the cloud-based infrastructure developed by the Kalpathy-Cramer lab and results comparison tools developed by the Saltz lab.

Docker container for FeatureDB to manage Pathology and Radiology feature sets and Docker container for analysis of pathology images.

Web-based applications driven by FeatureDB for exploration of combined Radiology & Pathology features.
