# Integrative Imaging Informatics for Cancer Research (I3CR)
Daniel Marcus, Richard Wahl – Washington University

Enhance the XNAT informatics platform to support imaging-based cancer research

I3CR Data Management Platform: The DMP will integrate with clinical and research devices, information systems and software applications to capture quantitative measurements, response criteria, treatment plans, outcomes, and other data in an integrated database.

I3CR Knowledge Management Platform: The KMP will enable reproducible research through shareable "portfolios" linked to publications, data, and analytic methods.
