HTT and the Medical Device Development Tool Submission

We are crowdsourcing pathologists to collect data (images + pathologist annotations) that can be qualified by the [FDA/CDRH medical device development tool program](#). If successful, the MDDT qualified data, along with a statistical software package for data the analysis, will be available to any algorithm developer to be used to validate their algorithm performance in a submission to the FDA/CDRH.

Original Proposal

Here is the original proposal submitted 15 November 2019.
