Can you bring your own rstudio / other interactive containerized app?

from Anton Kovalsky to Everyone: 3:18 PM

Certain interactive apps are already offered (Rstudio is already available, for example), however bringing in an entire oontainerized app that we don't already support is not as simple. Not impossible, but would likely require coordinating with our field engineering team

Thanks for the reply.

from Lakshmi Matukumalli to Everyone: 3:52 PM

Does it only work with Google ? not Amazon ?

Is firecloud available to anyone, or only NIH researchers?

from Narisu, Narisu NIH/NHGRI [E] to Everyone: 3:57 PM

Thank you Annie.

from Fujun Zhou to Everyone: 3:57 PM

Is it free for NIH users? How about other institutes, other than NCI.
